You are **paid** if you **solve the current puzzle** inside the markets.

If you fail, you pay the markets.

Your gain is never another's loss.

We either win or learn from our losses.

Financial markets are the **ultimate business**. Buyers are already there without marketing.

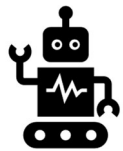

Financial markets **pool funds** from millions of people with millions of reasons for buying and selling

You are **paid** if you **solve the current puzzle** inside the markets. If you fail, you pay the markets.

Knowledge, analysis, skill, and emotional control, are the **keys to getting paid** from markets.

Artificial Intelligence & Robotics is putting jobs at risk intergenerationally. **Skill growth is required.**

Learning how to **make and keep money** is now essential for everyone. Do it for future generations.

Combining investing, trading, and emotional mastery are the **keys to success.**

Every success in your life is founded on **hard work, dedication, and commitment.** What you put in is what you get out.

Using leverage magnifies gains and losses. Until an expert at spot, stay away from leverage you will get financially destroyed no matter how much money you have.

At the start trade and understand the levels; become consistently profitable; then scale up; then leverage (optional).

@MiyaHedge

I lost it all.

\$12M – my whole network: Gone forever.

I should have never touched leverage, this was a huge mistake. I thought i could become one of the greatest. I really did. Now i'm left with nothing.

My girlfriend left me, i lost all the money my dad gave me, i can't get rid of my drug addictions.

It's truly over. There's no coming back from this.

Goodbye, see you in my next life.

ALL IN.

I bought another **\$10M in ETH** for the coming week.

Here is my reasoning on why I think this trend has been carried in an excess ...

- AAPL bounces from CTKS Support and TSLA from CTKS Resistance
- NVDA shares fell 6.7% Monday, the steepest decline on the Nasdaq and among the worst on the S&P 500.
- Mt Gox will start repaying Bitcoin and BCH in July. The Tokyo-based Mt. Gox was hacked in 2011 and went bankrupt in 2014 after losing 850,000 BTC. It will repay creditors around \$9 billion in Bitcoin, 142,000 BTC, and 143,000 BCH.
- Reversal in DXY and Yields, gave moderate rise to Gold and Silver.
- Copper could fall substantially. Oil is melting up (inflationary pressure).
- S&P500 and NASDAQ starting point of losing structure and cutting under but immediate structural support incoming; caution advised.
- DOW cut over and RUSSELL commencing; mixed signals.
